Taxlot Assignment Tool

General Description:

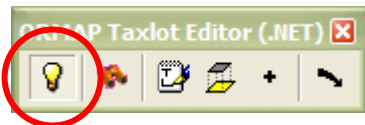

The “Taxlot Assignment” tool assigns taxlot numbers in sequence, based on a starting number and a step increment.

Prerequisites:

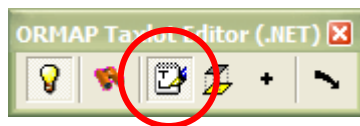

- Must have the MapIndex and Taxlot polygon feature classes and the Cancelled Numbers standalone table loaded into the active data frame of the current map document.

How to Use:

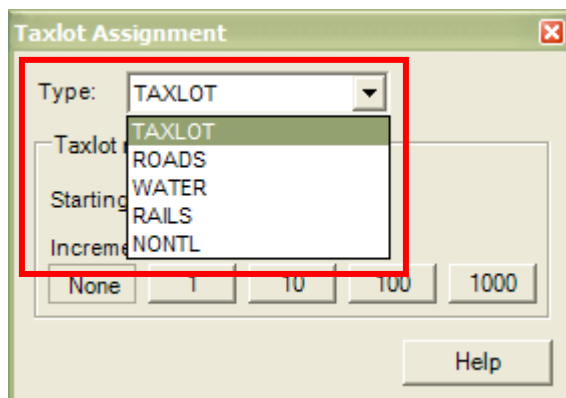

1. Start editing the workspace containing the Mapindex and Taxlot feature classes.
2. If desired, select the Autoupdate Features button to turn on field auto-updating. This will update all taxlot fields to match the new taxlot number.

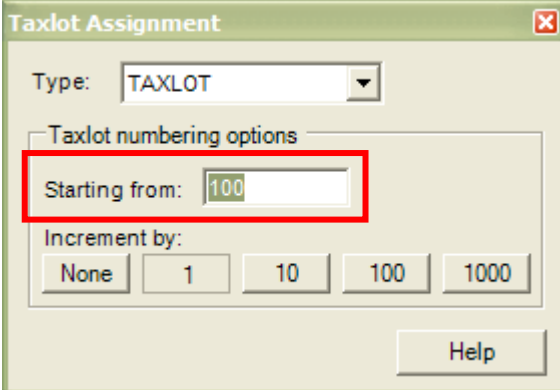

3. Press the “Taxlot Assignment” button on the ORMAP Editing toolbar.

4. Select the Type of Polygon.

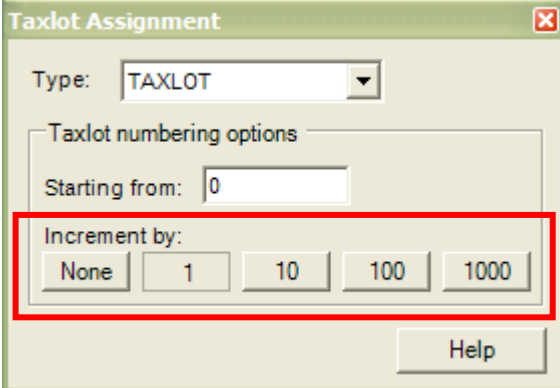

5. Enter a Starting From value.

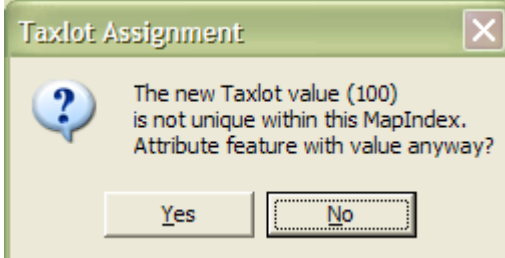

The 'Taxlot Assignment' dialog box is shown. The 'Type' dropdown is set to 'TAXLOT'. The 'Taxlot numbering options' section is expanded, showing 'Starting from: 100' (highlighted with a red box) and 'Increment by: None, 1, 10, 100, 1000'. A 'Help' button is at the bottom right.

6. Select an Increment By Option.

The 'Taxlot Assignment' dialog box is shown. The 'Type' dropdown is set to 'TAXLOT'. The 'Taxlot numbering options' section is expanded, showing 'Starting from: 0' and 'Increment by: None, 1, 10, 100, 1000' (highlighted with a red box). A 'Help' button is at the bottom right.

7. Click a taxlot on the map. The attributes will be updated to match your selection and the Starting From number will increase by the increment amount.
 - A. If the new taxlot number added already exists, a warning dialog window will appear asking you to confirm the assignment.

A warning dialog box titled 'Taxlot Assignment' is shown. It contains a question mark icon and the text: 'The new Taxlot value (100) is not unique within this MapIndex. Attribute feature with value anyway?'. There are 'Yes' and 'No' buttons at the bottom.

- B. If the taxlot already has a number, a warning dialog window will appear asking you to confirm the assignment.
